

# Big Feet

To remove the wheels, jack up the *RICKSHAW DOLLY*®. Hold the wheel in place and loosen the wheel bolt with a Size 8 Allen wrench.

Remove the wheel bolt from the guide and push the wheel out of the brake caliper. Block the brake piston using the retainer lock.

size	air pressure
21"	max 0,8 bar/max 11,6 psi

# Big Feet

Bring the Big Feet in position and screw the wheel bolt in.

Wheel arm/wheel standard position:  
Middle horizontal, second vertical row.

Please note:  
Manual, Operation and assembly instructions/  
6. main wheel unit
